

d&b audiotechnik loudspeaker systems are tools to develop and realize your business visions. Once you have decided on the next phase in your equipment requirements to achieve these objectives, the subsequent process is how best to integrate the financing of this into your plans.

The Finance-Series is exclusively designed to assist with this endeavour.

The Finance-Series is asset finance, not leasing. The difference is simple and decisive: with asset finance the equipment is yours right from the start, while leasing, the finance company owns the equipment for the duration of the agreement.

It goes without saying the interest rates for the Finance-Series are exceedingly competitive. Coupled with variable finance values and repayment periods that can be selected at the outset, this all adds up to a concise flexible scheme customized to your requirements. An initial deposit of 20% or more of the total purchase price is required and there is an option for partial or total repayment at any time during the finance period, subject to an early repayment fee.

Undoubtedly there are very good reasons in investing in new d&b loudspeaker systems, particularly to gain competitive advantages. The d&b Finance-Series provides yet another one. d&b has established a very welcome finance alternative that is attractive, transparent and finely adjusted to the professional audio business: you will always be able to provide the most current d&b equipment.
